

ROTTEFELLA

XCELERATOR 2.0, XCELERATOR JUNIOR, ROTTEFELLA PERFORMANCE ROTTEFELLA TOURING AUTO

Rottefella NIS bindings are designed to be mounted directly onto a Rottefella mounting plate without the use of screws. This allows users to move them forward or backwards for better grip and glide in classic skiing or better balance and control while skate skiing.

Compatible Mounting plates:

Rottefella NIS 3.0 Mounting plate
Rottefella NIS 1.0 Mounting plate
Rottefella Mounting plate

Rottefella Touring plate

Binding:

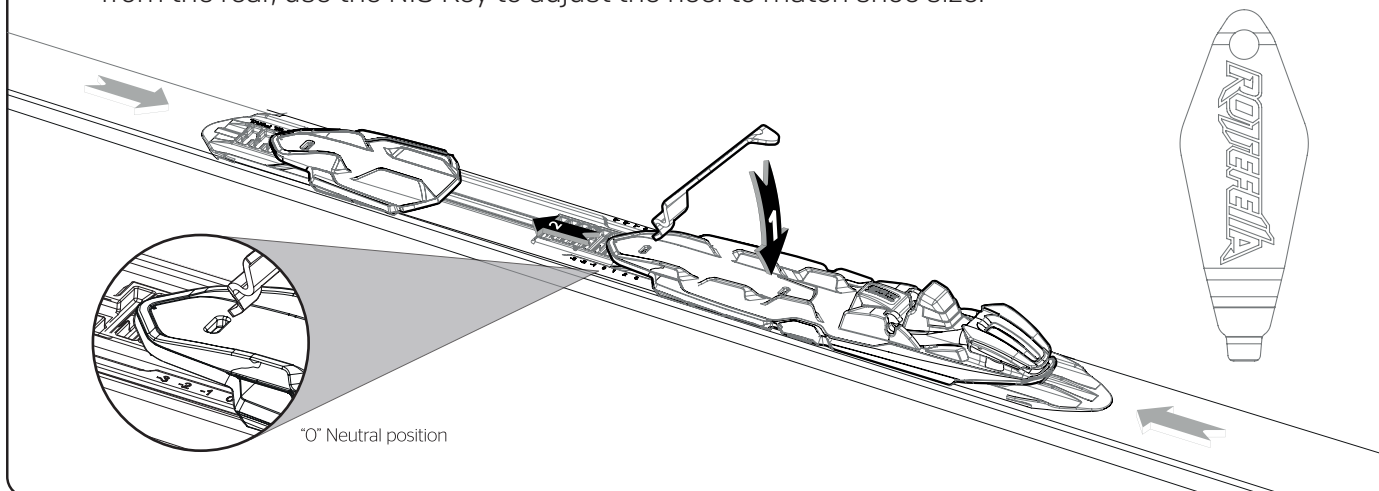

Xcelerator 2.0
Xcelerator Junior
Rottefella Performance
Rottefella Basic

Rottefella Touring Auto

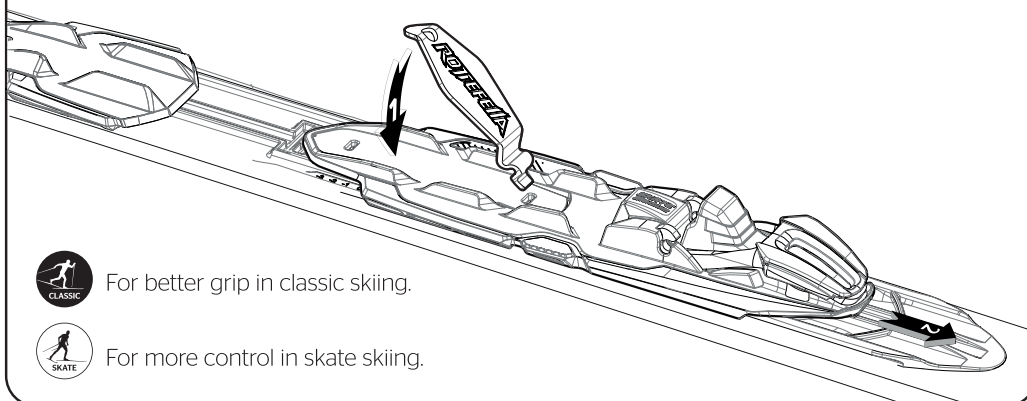

For roller ski: Use Rottefella Rollerski binding.

- Slide the binding onto the mounting plate from the top until it stops. Use the NIS Key by placing the tip into the slot as shown, push down (1) and backwards (2) to neutral position "0". Slide the heel from the rear, use the NIS Key to adjust the heel to match shoe size.

- Move binding **forward**: Place tip into slot, push down (1) and forwards (2) to preferred position.

- Move binding **backwards**: Place tip into slot, push down (1) and backwards (2) to preferred position.
